Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicant explained the difference between the "unpulped long natural fiber bundles" of their invention and the elementary fibers of the HOLM reference. The seed hair fibers of the HOLM reference are present naturally in the form of elementary fibers while the "unpulped long natural fiber bundles" of the present invention are bundled together and held by several natural binding components such as lignin and hemicellulose. (As defined by Applicants on page 1, lines 13-15 of the specification. The Examiners suggested to include the limitation "... natural fiber bundles held together by natural binding components...", to claim 5 in order to overcome the prior art of record. The 112 rejection of claim 16 has been withdrawn since it depends on claim 11, which has been allowed already.
